Colloids and Surfaces, 53 (1991) 416–417
Elsevier Science Publishers B.V., Amsterdam

Subject Index

Adsorption, 21, 47, 63, 101, 117, 183, 297, 315, 363
Adsorption rate, 117
Aggregation, 339
Air/water interface, 135
Alkylbenzene sulphonates, 63
Alkyl sulphates, 63
Alumina, 297, 315
Aluminum oxide powder, 383
Anion effect, 1

Bacteria, 21
BLMs, 135
Bubbles, 47

Calcium carbonate, 241
Cationic polyelectrolytes, 183
CdS(s), 275
Cellulose, 79
Cellulosic fibers, 183
Ceramides, 135
Charged surfaces, 183
Chelation, 339
Chemical grafting, 169
Collector adsorption, 33
Crystal growth, 209
  of calcium carbonate, 241
Cu-dispersion for crystallite size, 193
Cu-SiO_2 catalysts, 193

Demulsifier, 157
Dicarboxylic acids as growth modifiers, 209
Diffusion kinetics, 47
Dioleoyl phosphatidylcholine, 135
Dispersion quality, 393
Dissolution, 257, 275
DPPC, 117
Dynamic contact angle, 147
Dynamic wetting, 147

Effect of phosphonic groups, 167
Electrolytes, 21
Electron spectroscopy, 33
Electrophoresis, 383
Electrophoretic properties, 21
Emulsion, 157
Enthalpy, 297, 315

Extensional flow, 393

Fatty acids, 47
α-FeOOH,
  effect of dicarboxylic acid on, 209
  isoelectric point of, 209
  preparation from $FeSO_4$, 209
Fibers, 79
Film entrainment, 147
Fines, 79
Flocculation, 363
Foam stability, 47

Galena, 33
Gas chromatography, 169
Growth of α-FeOOH, 209

Heteroflocculation, 79
HgS(s), 257
Hydrous oxide, 1
Hydroxyapatite overgrowth on polymers, 167
Hydroxyoxime, 339

Inductance, 393
Inhibition of calcium carbonate, 241
Iron oxide, 393

Kinetics, 183
  of growth, 197

LB films, 135
Lewis acid/base, 101
Lifetime, 47
Liquid-liquid distribution, 339
Lung surfactant, 117

Magnetic particles, 393
Magnetic recording, 393
Metal distribution, 339
Microemulsion, 349
Minerals, 101
Monolayers, 135
Monooleoyl glycerol, 135
Morphology of α-FeOOH, 209

Neutron activation analysis, 169
NMR self-diffusion, 157
Noble metal adsorbents, 329
Nonaqueous suspensions, 363

Organic counterions, 157
Oxidation, 275

Photoacoustic infrared spectroscopy, 209
Photoirradiation, 257
Photooxidation, 275
Polymer additives, 363
Polymer adsorption, 329
Polystyrene adsorption, 329
Polystyrene-gold interaction, 329
Porapak-N and polystyrene divinyl benzene substrates, 197
Potential, 21
Precipitation,
  effect of cadmium and zinc on, 241

Raman spectroscopy, 349
Reconformation, 183
Retention, 79
Reversed micelles, 339
River sediments, 63
Road stone aggregates, 101

Sediments, 63
Separation of metal ions, 339
Si/SiO_2 heterostructures, 169
Silica, 363
Silicon microsensors, 169
Sol-gel preparation, 223
Solubilization, 339
Sorption, 1
Specific capacitance, 135
Specific resistance, 135
Spontaneous precipitation of calcium carbonate, 241
Stability region of calcium carbonate, 241
Steric stabilization, 363
Styrene polymerization, 349
Sulfonic acid, 339
Surface characterization, 101
Surface coverage, 47
Surface elasticity, 47
Surface hydrolysis model, 1
Surfactant, 393
Surfactant diffusion model, 117

Tetraalkylammonium ions, 157
Texture of the catalyst support, 223
Theta solvents,
  of polystyrene, 329
Titanium oxide, 79
Titration calorimetry, 297, 315
Turbidity, 157

Uranyl ion, 1

Vapor pressure osmometry (VPO), 339
Vaterite formation, 241
Vesicles, 135
Viscosity, 383
Volatilization, 257
Voltammetry, 33

Xanthate, 33
Xanthate coverage, 33
XPS analysis, 169

Zirconium oxide powder, 383
